FULL CYCLE INSIDER THREAT MANAGEMENT PLATFORM

DETER via access control. DETECT by monitor and alert.
DISRUPT by investigation and incident response

beSECURE Managed E-Business Security™   **EKRAN**

INSIDER THREAT HIDES IN ONE OF 10,000 USER DAILY OPERATIONS

When developing policies to mitigate insider security risks, security officers must consider specific approaches and tools. Detecting and investigating incidents caused by insiders is quite challenging for various reasons:

- Insiders have authorized access.
- One insider performs thousands of operations per day.
- Insiders know the ins and outs of the system.
- Insiders may collude and hide their tracks.

HOW EKRAN SYSTEM® MITIGATES INSIDER THREATS

Ekran System® is a full cycle insider threat management platform that focuses on three core goals: deter, detect, and disrupt.

Gartner peer insights™

" One of the fastest solutions that I have installed and configured. I can recommend EKRAN as a good, light and efficient User Monitoring Solution.

PROACTIVE
DETER
- Manage identities
- Control access

ACTIVE
DETECT
- Monitor activity
- Manage alerts
- Collect evidence
- Get notifications

REACTIVE
DISRUPT
- Investigate incidents
- Respond to incidents

WHY COMPANIES CHOOSE EKRAN SYSTEM®

- One-click search across suspicious activity
- Full desktop and server OS support
- Enterprise-ready
- Low total cost of ownership

GET MORE WITH ENTERPRISE-GRADE INSIDER THREAT DETECTION SOFTWARE

- Low incident response time with a visually structured evidence trail
- AI-based compromised account detection
- Lightweight software agent and highly optimized formats for storing data
- Quick installation and configuration (less than 20 minutes)
